"There is a silent health crisis in America...it's that fact that, on average, American men live sicker and die younger than American women." - Dr. David Gremillion, Men's Health Network

It has been called the "silent crisis" for good reason. It's Men's Health. Overall, men live "sicker" and shorter lives than women. It's common knowledge that a woman the same age as her husband will most likely live longer than he will. But the true crisis lies in the popular acceptance of these statistics. Every year, in every state, the death rate for men is higher than the rate for women.

Leading Causes of Death for Boys⁶

While the rates of birth defects are similar for both boys and girls, many more boys die from suicide and accidents than girls do. *It can be concluded that the higher rate of death in boys may be preventable.*

Aging in New Hampshire

More than one-half the elderly widows now living in poverty were not poor before the death of their husbands.

Meeting the Needs of Older Women: A Diverse and Growing Population, The Many Faces of Aging, -U.S. Administration on Aging

In New Hampshire, the male-female ratio converges in the early 30s, and then drops rapidly, as shown in this chart developed from year 2010 Census data.
